NowyStyl

Basic requirements for purchased items/materials

1. General

1.1. REACH declaration

Componets/materials/chemicals that are explicitly included in the following lists or that contain more than 0.1 % w/w of chemicals which are named in the following lists (including flame retardants or phthalates):

- annex XVII of REACH, or
- annex XIV of REACH, or
- REACH candidate list for annex XIV

1.2. RoHs declaration

Declaration of Conformity with RoHs Directive (applies to electrical components).

1.3. POP declaration

Declaration of Conformity with Regulation (EU) 2019/1021 of the European Parliament and of the Council of 20 June 2019 on persistent organic pollutants (POP).

1.4. General Product Safety declaration

Declaration of Conformity with Regulation (EU) 2023/988 of the European Parliament and of the Council of 10 May 2023 on general product safety.

1.5. Additional information:

- Weight of each component
- Clear material assessment of each component (i.e. detailed information of the material composition of the component: % share of kind of plastic, steel, etc)
- MSDS (material safety data sheets) based on the European CLP Regulation (EC) No 1272/2008 ((also for the chemistry used in the production of components supplied to Nowy Styl) - available in English.
- In case the component/material is made of recycled materials, determine the % recycled origin with post-consumer and pre-consumer breakdown (with safety assurance: no hazardous substances) and determination of recyclability.

1.6. Greenhouse gas emissions

Information on greenhouse gas emissions according to the methodology of ISO 14064-1 and the GHG Protocol (activities related to building scope 3 reporting for Nowy Styl Poland).

NowyStyl

2. Requirements for individual material groups

2.1. Wood and wood-based materials
European Parliament Regulation (EU) 2023/1115, the so-called EUDR (European Union Deforestation Regulation) - take steps to prepare for compliance with the following Regulation and, at the latest when it comes into force, provide mandatory information (including 'geolocation' of the origin of the raw materials used in the production process).

Wood materials complying with the Regulation (EU) no. 995/2010 ("Timber Regulation").

Low formaldehyde emission:
Reduced formaldehyde emission meeting the requirements of so-called "E05" class according to Commission Regulation (EU) 2023/1464 and German requirements (Chemicals Prohibition Ordinance / ChemVerbotsVO), based on European standards: EN 717-1 result ≤ 0.05 ppm ($\leq 0,062$ mg/m^3) or EN 16516 result ≤ 0.1 ppm.

2.2. Surface coating of metal parts
Regarding the chrome decorative coating: the hexavalent chromium is not being used (only Cr+3).

2.3. Upholstery materials (foam)

The Oeko-Tex Standard 100 or CertiPur certificate

Halogenated organic compounds, CFC and HCFC shall not be used as blowing, or auxiliary blowing agents, in the production of foam.

2.4. Upholstery materials (fabrics)
The Oeko-Tex Standard 100 and/or EU Ecolabel certificate.

2.5. Plastic parts

All plastic parts ≥ 50 g shall be marked for recycling according to ISO 11469

Clearly define the type of plastic

MSDS available in English.

2.6. Packaging materials
The packaging shall be made of at least 60 % w/w recycled material, if made of paper or cardboard, or at least 40 % w/w recycled material, if made of plastics

Official statement Suppliers:
• the percentage of recycled material used and recyclability
• compliance with the the EU Directive on Packaging and Packaging Waste (94/62/EC) with later amendments
• requirement for documented preparatory work to comply with European Packaging and Packaging Waste Regulation (PPWR).
